

CLEARSTART 22KZ

ANALYSIS	w/w
NITROGEN	1.8%
PHOSPHORUS	22.0%
POTASSIUM	7.5%
ZINC	1.0%
COBALT	0.07%
MOLYBDENUM	0.07%

CLEARSTART 22KZ is a unique Stoller formulation derived from MAP, Phosphoric Acid, Potassium, Zinc Oxide, Cobalt & Molybdenum.

PRODUCT CONTAINS 41% w/w WATER
TOTAL SOLIDS 59% w/w

GENERAL INFORMATION

- STOLLER'S CLEARSTART 22KZ is used as an in-furrow liquid injection fertiliser and can be used as a replacement for dry forms of starter fertiliser.
- CLEARSTART can be used in furrow at planting for most broad acre crops including: Wheat, Barley, Oats, Sorghum, Sunflowers, Chick-peas, Faba Beans, Soybeans, Cotton and Corn.
- CLEARSTART can be safely placed directly onto the seed in the furrow.
- Do not mix with alkaline products.
- It is always recommended to conduct a jar test or consult Stoller before mixing with other products such as insecticides.
- CLEARSTART may be mixed with Stoller's ACTION 5 in furrow.
- CLEARSTART may be mixed with Stoller Cropping Zinc if additional zinc is required.

MIXING INSTRUCTION

- CLEARSTART is a total solution and needs minimal mixing.
- It is important that sufficient water is added to ensure that a continuous band of liquid is achieved in the seed furrow. The minimum application is 50L/Ha. Higher water rates can improve stream and product placement.

STORE IN A COOL PLACE OUT OF DIRECT SUNLIGHT

CAUTION: Consult Stoller Australia or a Stoller Agronomist before mixing with insecticides or other products.

Seek medical attention. SKIN: Remove all contaminated clothing and wash affected area with plenty of soap and water. IF SWALLOWED DO NOT INDUCE VOMITING. Give plenty of water and seek immediate medical attention.

DIRECTIONS FOR USE

In Furrow/Irrigation		
CROP	RATES	COMMENTS
Winter Crops: Wheat, Barley, Oats, Chickpeas, Faba Beans and Canola	12.5-20 litres per hectare	Apply with sufficient water to create a continuous band in the furrow
Summer Crops: Sorghum, Sunflowers, Corn, Soybeans	12.5-15 litres per hectare	
Cotton Crops	10.0-30 litres per hectare	
Vegetable Crops	15-40 litres per hectare	Can be applied at seeding or transplant stages. Apply in multiple applications or as required throughout the crop.
Trees and Vines	25-50 litres per hectare	Apply in multiple applications or as required throughout the crop
Always flush the system with fresh water immediately following use.		
Foliar Applications		
All Broadacre crops above	5-15 litres per hectare	Apply from 4 to 6 true leaves onwards
All Vegetable Crops	5-8 litres per hectare	Apply from 4 to 6 true leaves onwards

ClearStart 22KZ can also be applied at similar rates through micro-irrigation to trees, vines and vegetables.

IMPORTANT NOTE: Apply ClearStart 22KZ with sufficient water to create a continuous band in the furrow.

USE OF FERTILISERS WITH INOCULANT CAN IMPEDE NODULATION AND IT IS NOT RECOMMENDED.

CONDITIONS OF SALE

1. Seller warrants that this product consists of the ingredients specified and is reasonably fit for the purpose stated on this label when used in accordance with directions under normal conditions of use. No one, other than an officer of Seller, is authorised to make any warranty, guarantee or direction concerning this product.
 2. Because the time, place, rate of application and other conditions of use are beyond Seller's control, Seller's liability from handling, storage and use of this product is limited to replacement of product or refund of purchase price.
