

MX SPECIAL

ANALYSIS

Minimum Guaranteed Analysis	%W/V
Zinc (Zn).....	1.33
Iron (Fe).....	1.33
Boron (B).....	0.50
Copper (Cu).....	0.17
Manganese (Mn).....	1.00
Sulphur (S).....	2.50
Magnesium (Mg).....	0.33
Molybdenum (Mo).....	0.02

PRODUCT CONTAINS 79.5 % W/W WATER
TOTAL SOLIDS 20.5 % W/W

GENERAL INFORMATION

MX SPECIAL is a foliar or soil applied multinutrient mix. It is non-phytotoxic when used as directed.

It is completely available and absorbed by the leaf or the root surface because of the natural complexing properties of its phenolic acid chelating complex. The cations are chelated using phenolic acid. It is an excellent acidification agent for lowering pH in spray tank water to decrease the hydrolysis of most pesticides.

If is an effective dispersing agent when applied with other foliar spray chemicals.

MIXING INSTRUCTIONS:

MX SPECIAL will disperse in water with little agitation. Many agricultural chemicals can be added and applied while spraying.

When foliar applying **MX SPECIAL** through conventional sprayers use a minimum of 200 litres of water per hectare.

When spraying with low volume equipment; 80 litres per hectare is usually sufficient, slight burning of the foliage may occur. A maximum of 5 litres per hectare per application is recommended. Aerial applications should not exceed 1 litre per 5 litres of water.

MX SPECIAL is manufactured to rigid controls at the highest possible concentration for effective usage. Any residue in the container is water soluble. Rinse the containers with water and add to the spray tank.

Caution: Always conduct a "Jar Test" using products in proper proportion to establish physical compatibility.

CAUTION

This product contains boron and the use of this product on any crop other than those recommended by this label may result in serious injury to the crop. This product may only be used on soils which respond to molybdenum. Crops high in molybdenum can be toxic to grazing animals. Avoid use with copper fungicides. Harmful if swallowed. Avoid contact with skin, eyes and clothing. Wash thoroughly with soap and water after handling. Avoid breathing spray mist.

RECOMMENDATIONS FOR USE

Vegetables, trees, vines, cereals and pasture.

DIRECTIONS FOR USE

SOIL APPLICATION

General seasonal application rates when leaf & soil test are not available.
 Maintenance application.....2 litres per hectare
 Moderate deficiency2 - 9 litres per hectare
 Heavy micronutrient deficiency3 - 18 litres per hectare

FOLIAR APPLICATION

CROP	RATE	COMMENTS
Vegetables	2 - 6 litres per hectare each spray.	Incorporate MX SPECIAL into the normal spray program.
Trees Fruit, & Nuts	2 - 6 litres in 1000 litres of diluted spray. 2 - 6 litres per hectare	If concentrated spray is used, increase the concentration in direct proportion to dilution. If tree crops are sprayed, several times a year the amount can be split into more numerous applications. Split applications are considered more beneficial than single applications.
Field Crops	2 - 6 litres per hectare	Apply when plants are young. This is the time when most severe deficiencies occur.

LIQUID FERTILISER

Mix **MX SPECIAL** with liquid fertiliser agitating to thoroughly disperse the trace elements. This can be achieved by adding the produce to a fertiliser mix tank or inducting through a pump. When mixing in batch tank, add product to water or nitrogen solution before adding phosphate material.

CONDITIONS OF SALE

1. Seller warrants that this product consists of the ingredients specified and is reasonably fit for the purpose stated on this label when used in accordance with directions under normal conditions of use. No one, other than an officer of Seller, is authorised to make any warranty, guarantee or direction concerning this product.
2. Because the time, place, rate of application and other conditions of use are beyond Seller's control, Seller's liability from handling, storage and use of this product is limited to replacement of product or refund of purchase price.
