

# WL MICROMIX CHELATE

ANALYSIS	w/v
ZINC (Zn)	4.0%
MANGANESE (Mn)	3.0%
COPPER (Cu)	1.0%
SULPHUR (S)	4.5%

Derived from:  
Zinc Sulphate, Manganese Sulphate, Copper Sulphate and Phenolic Acid.

**PRODUCT CONTAINS** **72% W/W WATER**  
**TOTAL SOLIDS** **28% W/W**

### GENERAL INFORMATION

**WL Micromix Chelate** is a foliar or soil applied multinutrient chelate. It is non phytotoxic when used as directed. It is completely available and absorbed by the leaf or the root surface because of the natural complexing properties of its phenolic acid chelating complex. It is an excellent acidification agent for lowering pH in spray tank water to decrease the hydrolysis of most pesticides. It is an effective dispersing agent when applied with other foliar spray chemicals.

### MIXING INSTRUCTIONS

**WL Micromix Chelate** will disperse in water with little agitation. Many agricultural chemicals can be added and applied while spraying.

When foliar applying **WL Micromix Chelate** through conventional sprayers use a minimum of 200 litres of water per hectare. When spraying with low volume equipment, 50 litres per hectare is usually sufficient, slight burning of the foliage may occur. A maximum of 5 litres per hectare per application is recommended. Aerial applications should not exceed 1 litre per 5 litres of water.

**WL Micromix Chelate** is manufactured to rigid controls at the highest possible concentration for effective usage. Any residue in the container is water soluble. Rinse the containers with water and add to the spray tank.

**Caution: Always conduct a "jar test" using all products in proper proportion to establish compatibility.**

### SHAKE WELL BEFORE MIXING

**STORE IN A COOL PLACE OUT OF DIRECT SUNLIGHT**

### CAUTION

Harmful if swallowed. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling. Avoid breathing spray mist.

### RECOMMENDATIONS FOR USE

Almonds, apples, avocado, barley, beans, broccoli, cabbage, carrots, cauliflower, celery, citrus, corn, grapes, lettuce, lucerne, melons, milo, netarines, peaches, peanuts, pears, pecans, peppers, plums, potatoes, prunes, rice, soybeans, sorghum, strawberries, sugar beets, sugar cane, sunflowers, sweet corn, tomatoes, turnips, walnuts, watermelons, wheat and most other crops.

### DIRECTIONS FOR USE

**General application rates when leaf & soil test are not available**

Maintenance application . . . . . 2 litres per hectare  
Moderate deficiency . . . . . 4-9 litres per hectare  
Heavy micronutrient deficiency . . . . . 9-18 litres per hectare

### FOLIAR SPRAY

CROP	RATE	COMMENTS
Vegetables	1-2 litres per hectare each spray	Incorporate WL Micromix Chelate into the normal spray program
Trees, Fruit and Nuts	4 litres in 2000 litres of diute spray	If concentrated spray is used, increase the concentration in direct proportion to dilution. If tree crops are sprayed several times a year, the amount can be split into more numerous applications. Split applications are considered more beneficial than single applications.
Field Crops	2-5 litres per hectare	Apply recommended rates when plants are young. This is the time when most severe deficiencies occur.

### LIQUID FERTILIZER

Mix **WL Micromix Chelate** with liquid fertilizer agitating to thoroughly disperse the trace elements. This can be achieved by adding the product to a fertilizer mix tank or ducting through a pump. When mixing in batch tank, add

### CONDITIONS OF SALE

Seller warrants that this product consists of the ingredients specified and is reasonably fit for the purpose stated on this label when used in accordance with directions under normal conditions of use. No one, other than an officer of the seller is authorised to make any warranty, guarantee or direction concerning this product. Because the time, place, rate of application and other conditions of use are beyond seller's control, seller's liability from handling/storage and use of this product is limited to replacement of product or refund of purchase price.
