PRODUCTS	DESCRIPTION	LABEL
ZM²	<p>Stoller's ZM² is a proven phenolic chelate nutrient containing zinc, manganese, magnesium and sulfur, suitable for soil and foliar treatment. Stoller's unique chelating technology enhances nutrient uptake, with a lower pH. The proven efficiency of Stoller's own phenolic acid chelate ensures efficient absorption by plant roots, leaves and tissue and full solubility (with wide compatibility) in the mixing tank.</p> <p>Analysis (Zn 3.6%, Mn 3.6%, Mg 3.6%, S 5%)</p>	
CoMo	<p>Stoller's CoMo is a combination of both cobalt and molybdenum. These 2 nutrients affect the total nitrogen supply to the plant, essential for the synthesis of vitamin B12 compounds required by the nitrogen-fixing process. With only one application per year, CoMo can increase sugar content of plants and help plants utilise water in dry years resulting in higher yields.</p> <p>Analysis (Co 1.0%, Mo 6.0%)</p>	
SETT/CaB	<p>Stoller's SETT/CaB is designed to assist the calcium replacement in the plant's cell walls and reduce localised ethylene production, when sprayed on the foliage. When used at regular intervals, SETT/CaB can increase fruit quality and reduce internal damage to storage tissue. This effective calcium treatment has been formulated with boron using Stoller's polyamine formulating agents.</p> <p>Analysis (Ca 11.0%, B 1.4%)</p>	
Harvest Plus	<p>Stoller's Harvest Plus is a NPK liquid product featuring high analysis phosphorus (P) and potassium (K), which is ideal for a wide range of crops. P and K enhance the energy and mobility of sugars throughout the plant and to the harvestable fruit.</p> <p>Analysis (N 2.0%, P 10.0%, K 20.0%)</p>	

NOTE: The above program is a guide only, before beginning a program consult your STOLLER AUSTRALIA Agronomist. A soil test is required to determine accurate application rates.

PRODUCTS	DESCRIPTION	LABEL
Bio-Forge	<p>Stoller's Bio-Forge contains a range of key nutrients to ensure healthy crop growth, even in stress conditions. An application of Bio-Forge after stress can help the plant restore normal growth and maintain yield potential. It is commonly used as a foliar spray, in furrow or seed and seedling treatment. The added cobalt and molybdenum can also assist in the reduction of ethylene stress and the utilisation of nitrates. Bio-Forge incorporates Stoller's Patented Technology, featuring unique chemistry.</p> <p>Analysis (N 2.5%, K 3.0%, Co 0.25%, Mo 0.35%)</p>	
Foli-Zyme	<p>Stoller's Foli-Zyme is a proven plant health product that enhances healthy growth in all plants. It is a complete liquid for stress relief with a unique nutrient combination containing Stoller's Co-Factor additives. Foli-Zyme is an effective foliar booster that can help a plant initiate new vegetative growth as well as recover from stress and slow growth. It is applied as a foliar, in repeat applications where necessary.</p> <p>Analysis (N 15%, K 3.0%, Ca 4.0% plus trace elements and Stoller's Co-Factors)</p>	
Liquid Boron	<p>Stoller's Liquid Boron provides boron for the complete, effective maintenance of boron levels in plant tissues or for the rapid correction of boron deficiencies in crops. Because boron is not mobile within the plant, a continuous supply to all growing points is required from germination to maturity. Frequent foliar applications of small amounts are more effective than larger, infrequent treatments. The unique complexing agents in Liquid Boron allow for application directly to the soil or foliage, for formulation with liquid fertiliser, or for tank mixing with most agricultural chemicals. Foliar application of boron is more efficient than soil application because it avoids the formation of complex soil borates. Liquid Boron is rapidly absorbed by the foliage and utilised by the plant.</p> <p>Analysis (B 13%)</p>

PRODUCTS	DESCRIPTION	LABEL
Sugar Mover	<p>Stoller's Sugar Mover restores growth balance and optimises bud and fruit development. Its unique foliar nutrient formula improves sugar transport and metabolism. Sugar Mover redirects carbohydrate movement away from the growing points and to the fruits and roots of the plant. This helps with evenness of fruit and the ability for the plant to withstand stress</p> <p>Analysis (B 10%, Mo 0.13% plus Stoller's Co-Factors)</p>	
RootFeed	<p>Stoller's RootFeed enhances and maintains strong, healthy root growth in a wide range of crops and conditions. The rapid intake of calcium with Amine N also improves balanced growth. It promotes the growth of healthier plants to lessen the impact of stress. RootFeed can be applied through any conventional fertigation system, hydroponics or micro dosage systems.</p> <p>Analysis (N 12.0%, Ca 8.5%, Mg 2.0% plus Stoller's Co-Factors)</p>	
X-Tender	<p>Stoller's X-Tender is used to delay the target harvest date on a range of crops. It is a foliar fertiliser containing cobalt and molybdenum which can delay fruit maturity. X-Tender slows the rate of ethylene and other hormones that cause maturity.</p> <p>Analysis (Co 2.0%, Mo 3.0%)</p>
