<b>Zinc Chelate</b>	<p>Stoller's Zinc Chelate is highly efficient and readily absorbed by the roots and leaves. Due to its phenolic acid chelate, the efficiency of Stoller's Zinc has been proven worldwide. As it is derived from phenolic acid, it remains readily available in the soil. It is also highly compatible with tank mixes. Stoller's unique chelating technology enhances nutrient uptake, with a lower pH. The proven efficiency of Stoller's own phenolic acid chelate ensures efficient absorption by plant roots, leaves and tissue and full solubility (with wide compatibility) in the mixing tank.</p> <p><b>Analysis (Zn 11.0%, S 5.0%)</b></p>	
<b>Magnesium Chelate</b>	<p>Stoller's Magnesium Chelate is a proven phenolic chelate nutrient containing magnesium and sulfur and is applied to the foliar or soil. Stoller's unique chelating technology enhances nutrient uptake, with a lower pH. The proven efficiency of Stoller's own phenolic acid chelate ensures efficient absorption by plant roots, leaves and tissue and full solubility (with wide compatibility) in the mixing tank.</p> <p><b>Analysis (Mg 5.0%, S 7.0%)</b></p>	
<b>SETT/CaB</b>	<p>Stoller's SETT/CaB is designed to assist the calcium replacement in the plant's cell walls and reduce localised ethylene production, when sprayed on the foliage. When used at regular intervals, SETT/CaB can increase fruit quality and reduce internal damage to storage tissue. This effective calcium treatment has been formulated with boron using Stoller's polyamine formulating agents.</p> <p><b>Analysis (Ca 11.0%, B 1.4%)</b></p>	
<b>Calcium 5X</b>	<p>Stoller's Calcium 5X is a specially formulated calcium nutrient which is highly available to the plant. Adequate calcium levels allow the plant to cope under stress conditions, enhancing the potential for optimal fruit development and quality. Calcium 5X also offers the added benefit of Stoller's Co-Factors.</p> <p><b>(Ca 5.0% plus Stoller's Co-Factors)</b></p>
