GENERAL INFORMATION

PHOS MOLY is a foliar fertiliser designed for crops responsive to phosphorus and molybdenum application. Phosphorus and molybdenum availability drops dramatically on acid (low pH) soils.

Phosphorus and molybdenum deficiencies are more harmful to crops that (1) use more nitrogen and (2) are sensitive to high nitrate amounts in tissue. PHOS MOLY an ideal foliar treatment for crops known to be responsive to molybdenum application (eg Merlot winegrapes) and other crops with identified deficiencies in phosphorus and/or molybdenum.

PHOS MOLY has a low pH and will buffer spray tank water. Do not use additional buffering agents or wetters.

MIXING INSTRUCTIONS

- PHOS MOLY will disperse in water with little agitation. Many pesticides can be added and applied while spraying.

CAUTION: Always conduct a "jar test" using all products in proper proportion in order to establish physical compatibility.
