

X-TENDER

ANALYSIS

	W/V
COBALT (derived from cobalt sulphate)	2%
MOLYBDENUM (derived from sodium molybdate)	3%

PRODUCT INFORMATION

X-Tender is a specialty foliar fertiliser containing Cobalt, Molybdenum and formulating agents. Cobalt and Molybdenum are important micronutrients. Cobalt and Molybdenum can delay fruit maturity. When applied as a foliar spray, X-Tender will slow the rate of ethylene and other hormones that cause maturity.

X-Tender is used to delay the target harvest date on a range of crops. Always ensure a sound fertiliser program and good calcium nutrition for crops treated with X-Tender. Do not use on plants deficient in copper.
